Betadine Stain Buster[™]

Description

- Instantly neutralizes betadine and iodine-based stains.
- Rapidly removes betadine and iodine-based stains from hard surfaces.
- Quickly removes betadine and iodine-based stains from fabrics and linens in laundry applications.
- Neutralizes betadine and iodine-based products into water.
- An aqueous solution with a free-rinsing formula.
- Bio-based, all-natural and biodegradable.

Technology Profile

Nano particles are continuously involved in random repulsion from each other and, as a result, are disorderly and endlessly moving in a "BROWNIAN MOTION." Their continuous chain-collision creates significantly smaller particles. This endless mobility and continuous fragmentation is called "Nano-Activity."

Several factors contribute to the phenomenal success of "Active-Nano." First, Active-Nanoids chip away the soil and dirt from any surface without chemical intrusion. By continuous fragmentation of the original size of a Nanoid particle, Active-Nanoids produce significantly smaller Nanoidal particles making them more accessible for different sizes of openings in cleaning surfaces.

The second contributor is the composition of an Active-Nanoid which possesses equal hydrophilic/hydrophobic properties. Thus, water solubility or oiliness of the working environment doesn't make any difference. The third contributor is the matrix structure which is a cleaning application. It helps to prevent the re-depositing of soil back onto the cleaning surface. The fourth contributor is the porosity of Active-Nanoid particles which traps and absorbs the particles suspended in media, holds them and renders them inert.

Technical Information

Usage	Dilution Ratio	RTU
Physical Properties	Appearance	Liquid
	Color	Clear
	Fragrance	None
	pH	7
	Shelf Life	Minimum 1 Year
Primary Packaging	9007-001	(12) 32 oz./946 ml.
	9007-004	(4) 1 gal./3.78 L

Advantages

A highly effective, ready-to-use neutralizing solution designed to remove betadine stains.

Rapidly dissolves betadine from most fabrics, including carpets, uniforms, scrubs and all clothing. Instantly removes stains from floors, tiles, countertops, tables and more.

It not only removes betadine and iodine-based spills and stains, it also neutralizes the solution. It chemically transforms the betadine and iodine-based products into water. Iodine-based products such as betadine are halogens and are considered to be hazardous chemicals. Iodine is considered a poison and can be extremely toxic if used improperly. Betadine Stain Buster[™] safely and completely neutralizes the hazardous components in iodine-based products converting them into water.

Application

Laundry: Use as a pre-spray, applying Betadine Stain Buster[™] directly on stained item. Launder normally.

Carpet, Upholstery and Fabrics: Apply Betadine Stain Buster[™] directly on the stained area. Gently agitate with a clean cloth or brush. Blot with a clean, white absorbent cloth.

Countertops, Tiles and Floors: Apply Betadine Stain Buster[™] directly on the stained area. After stain is removed, blot with a clean, white absorbent cloth and rinse with water.
