

Description

- Odor neutralizing formula that destroys odors on contact.
- Eliminates the toughest odors in the air and on hard surfaces.
- Refreshes fabrics, instantly neutralizing odors.
- Long-lasting odor control, neutralizing the toughest odors.
- Chemically alters all odors from carpet, hard surfaces and in the air.
- Bonds permanently with surface and airborne odors from mold, smoke, urine and vomit.
- Unlike ordinary air fresheners that dissipate in minutes – it continues to work for hours.
- Odor neutralizer – not a masking or covering agent.
- Apply in a fine mist, fog or add to mop water.
- Bio-based, all-natural and biodegradable.

Technology Profile

Phytology is a revolutionary technology that relies on using bioflavonoids and plant extracts that create a synergistic reaction and, when combined, produce extremely powerful neutralizing agents. Until recently, hazardous cleaning chemicals were considered to be the answer to cleaning and odor problems. Phytology Technology has been incorporated into state-of-the-art products that naturally eliminate noxious odors.

Technical Information

Usage	Dilution Ratio	RTU
Physical Properties	Appearance	Liquid
	Color	Clear
	Fragrance	None
	pH	7
	Shelf Life	Minimum 1 Year
Primary Packaging	9502-001	(12) 32 oz./946 ml.
	9502-004	(4) 1 gal./3.78 L

Advantages

There is a major difference between odor neutralizers and simple masking agents. A masking agent is not effective for removing odor: it merely covers it up with another, stronger odor. When the masking agent wears off, the malodors become noticeable again.

Five Star Odor Buster - Indoor™ destroys neutralizes odors at their source, as well as organically neutralizes all odor-causing molecules without leaving a lingering scent.

Eliminates smoke, food, urine, vomit, mold and biological odors, even in confined areas. It creates a neutral atmosphere where objectionable odors have been removed and no replacement odor has been created.

Can be used in hospitals, nursing homes, schools, kennels and various other locations.

Application

Remove as much of the odor-causing element, as possible. Apply liberally and directly to odorous surfaces in affected areas with the aid of conventional sprayer, automatic misting system or spray bottle. When using the product in an enclosed area, apply into the air with a fogging machine. Allow to remain undisturbed for at least 15 minutes, then wipe excess from fabric and carpets with a clean, absorbent towel.
