

Description

- A blend of botanical extracts that neutralize outdoor odors.
- Eliminates flies instantly and permanently.
- Instantly destroys odors from refuse containers and collection vehicles, landfills, sewers and more.
- Alters the method bacteria decomposes waste so that it does not produce noxious odors.
- Extremely effective against sulphur, nitrogen and mercaptan-based odors.
- Does not mask or cover odors like heavily-fragranced concentrates.
- Applied by misting, spraying, dripping or fogging.
- One gallon of diluted product treats 1,000 square feet.
- Bio-based, all-natural and biodegradable.

Technology Profile

It utilizes Floratec Technology to neutralize and eliminate noxious odors instantly. Most odors are caused by bacteria consuming some type of waste and, as they do, they produce a hydrogen sulfide odor and other rancid-smelling substances. Floratec Technology uses natural vitamins and minerals to chemically alter the bacteria digestive system which allows them to continue to consume the waste but in a method in which they do not produce odors. It does not kill or damage any bacteria system – instead, it supplies essential supplements which enhance the metabolic chemistry of the bacteria. It also increases the dissolved oxygen in water which allows the bacteria to become more vigorous and digest waste more efficiently.

Technical Information

Usage	Dilution Ratio	1:5, RTU
Physical Properties	Appearance	Liquid
	Color	Amber
	Fragrance	None
	pH	7
	Shelf Life	Minimum 1 Year
Primary Packaging	9702-001	(4) 1 gal./3.78 L
	9703-001 (RTU)	(4) 1 gal./3.78 L

Advantages

There is a major difference between odor neutralizers and masking agents. A masking agent is not effective for removing odor. It merely covers it up with another, stronger odor. When the masking agent wears off, the malodors become noticeable again.

It effectively and safely controls waste water odors, lift stations, air scrubbers, lagoons, refuse containers and vehicles as well as landfills.

It neutralizes malodors, performing complete odor removal leaving no peripheral odors or odorous by-products and without using perfumes, masking agents, oxidizers and chlorine-based chemicals.

Five Star Odor Buster-Outdoor™ is an all-natural broad spectrum odor-neutralizing agent produced from natural plant extracts which eliminates the need for multiple products. Five Star Odor Buster-Outdoor™ is safe, bio-based, all-natural and biodegradable, and contains no harmful chemicals.

Application

Dilute with water at a 1:5 ratio.

Apply (1 gallon to 1,000 square feet) directly to odorous areas with the aid of conventional sprayer, automatic misting system or fogging equipment.

Re-apply as necessary.
